

FEE UPDATES

EFFECTIVE JULY 1, 2022

This document contains updates to the ADDL fee schedule including fee changes, new tests, and discontinued tests. The fee changes will take effect July 1, 2022, and are necessary to cover the continually rising cost of testing supplies and diagnostic equipment maintenance. In response to client needs, new tests are being validated and will be available to clients upon completion of test validation. Tests marked for inactivation are due to a combination of rising costs and low requests, making them cost-prohibitive to offer. Tests will be discontinued when current reagents are exhausted or expire. Please refer to the ADDL website for the most current test availability.
