

GLOBAL ENGAGEMENT

BY THE NUMBERS IN 2018

Global Engagement
COLLEGE OF VETERINARY MEDICINE

The Purdue University College of Veterinary Medicine Office of Global Engagement has developed partnerships with a number of universities around the globe, giving students access to a diverse range of exchange programs, faculty-led study abroad experiences, and international opportunities and externships.

In this new age of globalization, our society needs globally conscious veterinarians that are dedicated to affecting world change through the improvement of animal and human health; veterinarians that are prepared to collaborate, exchange, and engage with the world around them. The Office of Global Engagement has been working to expose students to the international landscape and prepare them to engage with the global community. These experiences will go a long way in making a positive impact on society.

79 PVM STUDENTS

| IRELAND | THAILAND |
| ITALY | ZIMBABWE |

"The veterinarians and staff at ARCAS are incredibly knowledgeable and obviously have a passion for teaching. Much of the education and curriculum is hands-on. Wildlife rehabilitation requires thinking outside of the box and getting creative, and staff were able to help us open our minds to this side of medicine!"

Megan Allan
Veterinary Nursing Class of 2020

Destination // ARCAS
Wildlife Rehabilitation Center
in Guatemala

Purdue University Veterinary Nursing students completing check-ups with Dr. Alejandro Morales at the ARCAS Wildlife Rehabilitation Center in Guatemala

9 EXCHANGE PROGRAMS WITH GLOBAL UNIVERSITY PARTNERS

Hannah working in the Vet for Your Pet Clinic in Nepal

"The owner and veterinarian, Dr. Pranav, holds students to a very high standard and has high expectations which helped me maximize the limited time I had there. During my time there, I gained clinical experience that will aid me in becoming a better veterinarian, and I enhanced my global consciousness by immersing myself in the local community."

Hannah Bennet
DVM Class of 2021

Destination // Vet for Your Pet Clinic with Dr. Pranav in Nepal

"This global engagement program was one of the most fulfilling experiences I've ever had. This trip was more than just learning Traditional Chinese Medicine, which was amazing; it was about the experience of another country and culture."

Edris Grate
DVM Class of 2021

Destination // Sichuan Agricultural University in China

Edris learning about Traditional Chinese Acupuncture Medicine with Dr. Changliang He of Sichuan Agricultural University
