

GLOBAL ENGAGEMENT

GLOBAL PERSPECTIVES IN VETERINARY MEDICINE

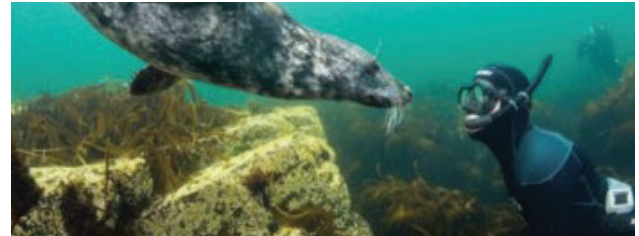

Summer 2020 Online Series:

The Global Perspectives in Veterinary Medicine Online Series was created to provide participants with a comprehensive view of the various career paths available to veterinary professionals. This online series is tailored to provide participants a better understanding of the impact of veterinary medicine throughout the world.

Consisting of live interviews, presentations, and discussions on a variety of veterinary medicine related topics, the series, hosted on Zoom, allows participants to view their profession through the various lenses of those in the field.

The recent interruptions caused by COVID-19 has limited our ability to travel, but it has not limited our aptitude to connect with one another. Overall, these sessions are designed for participants to place their career in a larger global framework. In these times, it is more important than ever that we work toward developing globally conscious veterinary professionals that are ready to collaborate, exchange, and engage with the world around them.

In lieu of going abroad this year, PVM students who participate in five of the seven sessions are eligible for completion of the Global Veterinary Medicine Certificate Program.

SOUTH AFRICA

JUNE 11, 12:00 PM (EST)

Wildlife Conservation & Medicine in South Africa
Kim & Hein Schoeman
