PHARMACY MENTORSHIP

VM 22300

CRITERIA HANDBOOK AND LOGBOOK
INDEX OF NOTEBOOK

Student Information

- Goals of Pharmacy Clinical Mentorship
- Contact person at Purdue University
- Pre-requisites for VM 22300 Pharmacy Clinical Mentorship
  - Contracts and agreements
  - Technical standards
  - Insurance
- Selection of Clinical Mentorship site – facility criteria
- Selection of Mentorship Supervisor
- Materials – The Criteria Handbook and Logbook
- Completion of Pharmacy Clinical Mentorship

Clinical Mentorship Tasks

Introduction to Essential Tasks and Criteria
1. Mentorship Facility Tour
2. Fill out a medication label
3. Fill a drug order for an oral solid medication
4. Fill a drug order for a liquid medication
5. Reconstitute a medication for dispensing
6. Reconstitute a vaccine
7. Dispense medications to the client*

Clinical Mentorship Projects
8. Controlled substances project
9. Inventory procedures project
10. Handling of Biologicals/Hazardous medication project

NOTE THE FOLLOWING DUE DATES FOR THE TASKS ABOVE:

Fall or Spring semester
11:59 p.m. ET Thursday of week 2 – Task 1
11:59 p.m. ET Thursday of week 5 – Tasks 2-6
11:59 p.m. ET Thursday of week 11 – Tasks 7-10

Summer session
11:59 p.m. ET Thursday of week 2 – Task 1
11:59 p.m. ET Thursday of week 5– Tasks 2-6
11:59 p.m. ET Thursday of week 9– Tasks 7-10

Incomplete grades will not be assigned for mentorships at the end of the semester.
Grade penalties will be assessed for tasks submitted after the due date.
Resubmission due dates will be set by the instructor as required.

*IMPORTANT! See following page for Animal Use Guidelines
Animal Use Guidelines

The student shall abide by the following guidelines when performing mentorship tasks:

1. All animals used for demonstration of mentorship skills must be appropriately restrained by another person, for the safety of the patient and the student.
2. A mentorship task may be performed only once on a single animal.
3. A student may perform a maximum of ten (10) minimally invasive tasks (denoted by one asterisk) on a single animal within a 24-hour period.
4. A student may perform a maximum of three (3) moderately invasive tasks (denoted by two asterisks) on a single animal within a 24-hour period.
5. When combining tasks, a student may perform a maximum of five (5) minimally and three (3) moderately invasive tasks on a single animal within a 24-hour period.
6. Tasks denoted with no asterisks do not involve live animal use.

For example, a student might perform the following tasks on an animal in a single day:

1. Restrain a dog in sternal recumbency*
2. Restrain a dog in lateral recumbency*
3. Restrain a dog for cephalic venipuncture*
4. Restrain a dog for saphenous venipuncture*
5. Restrain a dog for jugular venipuncture*
6. Administer subcutaneous injection**
7. Administer intramuscular injection**
8. Intravenous cephalic injection – canine**

Failure to comply with the Animal Use Guidelines may result in failure of the Clinical Mentorship.
STUDENT INFORMATION

GOALS OF VM 22300 PHARMACY CLINICAL MENTORSHIP

Working with a veterinary care facility, the student will perform tasks under the supervision of a clinical mentor (veterinarian or credentialed veterinary technician).

In order to achieve the goals for this Clinical Mentorship, the tasks must be performed to the level of competency as outlined by the Criteria for each task.

The student is responsible for providing documentation for each task as defined by the Materials Submitted for Evaluation and Verification section on each task.

In addition to the documentation, the Clinical Mentorship site supervisor will verify that the student performed the task under their supervision.

Final approval of successful performance and completion of the Clinical Mentorship will be made by the Purdue University instructor in charge of the Clinical Mentorship. This approval will be based upon the documentation provided by the student.

The Purdue University instructor in charge has the option to require additional documentation if, in their judgment, the student has not performed and/or documented the task to the level set by the Criteria.

Documentation of completed tasks is essential to validate the educational process and insure that the performance of graduates of the Veterinary Nursing Distance Learning Program meets the standards of quality required by the Purdue University College of Veterinary Medicine faculty and the American Veterinary Medical Association accrediting bodies.

CONTACT PERSON

Any questions regarding the Clinical Mentorship process should be directed to:

Pam Phegley, BS, RVT
Purdue University
Veterinary Technology Program
625 Harrison Street, Lynn Hall G171
West Lafayette IN 47907
(765) 496-6809
phegleyp@purdue.edu
PRE-REQUISITES FOR VM 22300 PHARMACY
CLINICAL MENTORSHIP

Contracts and Agreements

Because of legal, liability and AVMA accreditation issues, the following documents must be submitted prior to beginning the Clinical Mentorship:

1. Clinical Mentorship and Facility Requirement Agreement
2. Supervisor Agreement
4. Professional Liability Insurance Coverage

These documents are available on the VNDL website.

If more than one Clinical Mentorship course is taken, separate Clinical Mentorship and Facility Requirement Agreement and Supervisor Agreement must be completed for each course.

More than one Mentorship Supervisor may sign the mentorship logbook. Each must be either a DVM or a credentialed technician, and must complete a separate Supervisor Agreement.

Failure to complete and submit the listed documents and/or non-payment for Student Professional Liability Insurance Coverage will prevent the student from enrolling in the Clinical Mentorship.

Insurance

Two types of insurance are recommended or required for the student working in a Clinical Mentorship.

Health Insurance is highly recommended to cover the medical expenses should the student become injured while on the job. It is the student’s responsibility to procure such insurance.

Liability Insurance is required to protect the student in the event of a suit filed against the student for acts he/she performed while in the Clinical Mentorship.

Each VNDL student is required to purchase, for a nominal fee, Professional Liability Insurance through Purdue University. The fee covers from the time of initiation of coverage until the subsequent July 31st.

Students will not be enrolled in Clinical Mentorships until the Professional Liability Insurance is paid, and the student is covered by the policy.
WHAT TO LOOK FOR IN A MENTORSHIP FACILITY

When evaluating a facility for clinical mentorships, the student should thoroughly research the site. It is strongly suggested to visit the site if not currently working there. This experience is a chance to begin to apply the wealth of knowledge and skills acquired and developed to this point in the veterinary nursing education. The following are points of discussion or questions to consider when evaluating the site (RVT includes any credentialed veterinary technician):

- Does the site currently have credentialed veterinary technicians/nurses on staff?
- Are there any boarded DVM specialists or VTS RVTs on staff?
- What is the role of the technician/nurse versus other members of the staff (such as veterinary assistants)?
- What is the overall size of the staff (professional and paraprofessional staff)?
- Is the site an accredited practice or facility (AAHA, ALAC, etc.)?
- Has the site hosted a VNDL student in the past?
- Does the staff seem receptive to hosting a student?
- Is the site located in a safe and easily accessible location? Are there geographical considerations?
- Is this also an employment opportunity?
- Ask the supervisor:
  - What are their specific goals for the student?
  - Have they ever been a supervisor before for a veterinary technician/nursing student?
  - Who else at the site may be involved in supervision?
  - Do they have any concerns for the legal allowances in which the student may perform certain tasks?

It is strongly recommended that the student show potential mentorship supervisor(s) examples of mentorship logbooks, so they are aware of what the student will need to accomplish in this facility. The discussion should include that most tasks will require videos of the student performing skills, and how this will be accomplished. A student may have multiple supervisors (either DVM or credentialed technician), and one must be present any time the student is performing skills for a clinical mentorship. Supervisors sign Task Verification forms which state that they observed the student as they performed each task. Mentorship supervisors act as coaches and must be present to ensure the safety of the patient and personnel. They are not involved in evaluation of skills; this is done by Purdue instructors.
SELECTING THE CLINICAL MENTORSHIP SITE – FACILITY REQUIREMENTS

You must visit the Clinical Mentorship Site and determine if the following supplies and equipment are readily available to you for use during your Clinical Mentorship. You must complete and have the facility veterinarian sign the VM 22300 Clinical Mentorship and Facility Requirement Agreement.

The veterinary care facility must be equipped with the following equipment/supplies:

Adhesive medication labels
Oral solid medication
Liquid oral medication
Pill counting tray with spatula or tongue depressor for counting medication
Pill vial
Syringes (sizes 1cc-60cc) and Needles (25ga-20ga)
Bottles for dispensing liquid medication
Medication that needs to be reconstituted (i.e. Amoxi drops)
Vaccine that needs to be reconstituted prior to administration
Topical Medication

There must also be a live animal available on which to demonstrate administration of medications
SELECTION OF CLINICAL MENTORSHIP SUPERVISOR

The Clinical Mentorship Supervisor is the person who will sign Task Verification forms that verify performance of tasks at the Clinical Mentorship site. This person must be a credentialed veterinary technician (have graduated from an AVMA accredited program or met State requirements for credentialing as a veterinary technician) or a licensed veterinarian.

An individual who claims to be a “veterinary technician” but has not met the criteria for credentialing above is not eligible to be mentorship supervisor.

The individual is not considered to be an employee of Purdue University when acting as your Clinical Mentorship supervisor.

Each Clinical Mentorship Supervisor must complete a Supervisor Agreement and Mentorship Code of Conduct. The student must return these agreements with the other agreements prior to beginning the Clinical Mentorship. Multiple supervisors may be used for documentation of mentorship tasks. Each supervisor must complete a separate agreement.

Should the Clinical Mentorship Supervisor change during the course of the Clinical Mentorship, the student will need to have the new supervisor complete a Clinical Mentorship Supervisor Agreement and return it to the Purdue VNDL office. These forms are available on the VNDL website for downloading and printing.

Multiple Clinical Mentorship Supervisors may be utilized so one person does not have to be present for all task performances. Each supervisor must submit a Clinical Mentorship Supervisor Agreement.

ALL TASKS PERFORMED FOR A MENTORSHIP MUST BE OBSERVED IN PERSON BY A SUPERVISOR FOR WHOM DOCUMENTATION HAS BEEN SUBMITTED
CRITERIA HANDBOOK AND LOGBOOK

This Criteria Handbook and Logbook contains the list of tasks that must be successfully completed in order to receive credit for this Clinical Mentorship. The student is expected to have learned the basics of how, why, and when each procedure is to be done from the courses listed as pre-requisites for this Clinical Mentorship. This booklet contains the directions and forms that must be followed and completed in order to meet the standards set for successful completion of this Clinical Mentorship.

Please read each component of each task carefully before performing the task to minimize required resubmissions. The components of each task are summarized:

**Goal** – Describes the ultimate outcome of the task the student will perform.

**Description** – Lists the physical acts the student will perform, and under what conditions these acts will be completed.

**Criteria** – Lists specific, observable, objective behaviors the student must demonstrate for each task. The ability to demonstrate each of these behaviors will be required in order to be considered as having successfully completed each task.

**Number of Times Task Needs to be Successfully Performed** – States the required number of times to repeat the tasks. The patient’s name and the date each repetition of the task was performed must be recorded on the Task Verification Form.

**EACH REQUIRED REPETITION OF THE TASK MUST BE PERFORMED ON A DIFFERENT ANIMAL.** The student may not use the same animal to do all of the repetitions of a task. However, the same animal may be used to perform different tasks. In other words, one can’t do three ear cleanings on the same animal, however, one may do an ear cleaning, an anal sac expression, and a venipuncture on the same animal.

**Materials Submitted for Evaluation and Verification** – These specific materials, which usually include video or other materials, must be submitted to demonstrate that the student actually performed the task as stated. Each evaluation states specifically what must be shown in the submitted materials.

*The Purdue University course instructor for this Clinical Mentorship has the option to request further documentation if the submitted materials do not clearly illustrate the required tasks.*

It is recommended that the video materials document all angles of the procedure. The purpose of the video and other material is to provide “concrete evidence” that the student was able to perform the task to the standard required.

Pre-planning the videos will help reduce the need to resubmit tasks. The student should narrate the video as they work, explaining what they are doing and why. This helps the evaluator follow the thought process and clarify what is seen on the video. The student’s face must be shown at some point in every video to verify their identity. The name and/or number of the task should be either stated at the beginning of the video or embedded (written) into the video itself.

Videos, photographs, radiographs, slides, written projects, the Criteria Handbook and Logbook and any other required documentation will not be returned. These items will be kept at Purdue as documentation of the student’s performance for accreditation purposes.
This validation is essential to help the Purdue VNDL meet AVMA accreditation criteria. Therefore, it is essential that the student follows the evaluation and validation requirements.

Task Verification Forms – Each task has a form that must be completed and signed by the Clinical Mentorship Supervisor. A supervisor must observe every performance of a skill for a clinical mentorship.

Supplementary Materials – Logs, written materials, photographs, or other forms/documentation may be required for specific tasks. The “Materials to be Submitted for Evaluation” section outlines what is required to submit for each task.
COMPLETION OF THE CLINICAL MENTORSHIP

Mentorship logbooks include due dates for sets of tasks. Each set must be submitted by the deadline listed in the logbook. Late submissions will incur a grade penalty. Incomplete grades will not be assigned for mentorships at the end of each semester.

Feedback will be emailed to the student following review of each set of submitted tasks. As necessary, instructors may require resubmission of some tasks. When feedback is sent, due dates for resubmissions will be given. It is crucial that students with pending feedback check their Purdue emails frequently so this information is received in a timely manner.

Final approval of successful performance and completion of the Clinical Mentorship will be made by the Purdue University instructor in charge of the Clinical Mentorship based upon the documentation provided by the student.

Upon successful completion of all tasks in the clinical mentorship course, a grade will be assigned by the course instructor based upon the documented performance of the tasks.

Note: A student who is dismissed from their mentorship facility may fail the course and may be dismissed from the program.

Task Verification forms and other written materials should be submitted in Assignments in Brightspace. Task Verification forms are due by the task due date in order for each task to be complete. You must assign the forms and any other supplemental paperwork required for the tasks, to the correct course assignment in order for the instructor to view them.

Videos should be submitted in Assignments in Brightspace. This method of online submission does not limit how much you put on, is no cost to you, and automatically archives. You must assign the videos to the correct course assignment in order for the instructor to view them.

Using Kaltura for Video Assignments

Kaltura is a secure streaming service that Purdue offers for faculty, staff, and students. Videos uploaded to an assignment via Kaltura will only be accessible to instructor(s) within the course.

Step 1: Set Video Type on Your Device

Confirm your device is recording in a format accepted by Kaltura; common formats include:

• .MOV/.MP4/.M4V • .WMV
• .AVI
• .WEBM

Kaltura cannot accept the HEVC video format.

iPhone/iPad:

• Click on Settings->Camera->Formats
• Change the format to Most Compatible.
Android:

- In your camera application’s settings, change the video recording format to MOV, M4V, or MP4.

Desktop/Laptop:

- Depending on your recording application, you will need to save your video recording as a common video format (such as .mp4, .mov, or .m4v).

**Step 2: Allow your Browser to use Pop-Up Windows**

Confirm your browser has pop-ups enabled. Kaltura will pop open a window for you to upload your video. Use the Help feature in your preferred browser if you need assistance in enabling pop-up windows.

**If you do not allow pop-up windows on your browser, you will not be able to upload videos.**

**Step 3: Ensure You Have a Stable High-Speed Internet Connection**

Confirm you have a stable internet connection; if you are on a connection that can disconnect on a regular basis your upload may be cancelled. Additionally, you will need to have a high-speed connection. Videos may have large file sizes, and a slow connection may result in your video taking a very long time to upload. If you need a stable and fast internet connection but do not have one at home, consider using public wifi at a library or coffee shop.

**Step 4: Uploading Your Task Verification Form (TVF)**

You must upload your TVF at the same time that you upload your video.

- *Open* the assignment in Brightspace
- *Click* on the “Add a File” button. A dialogue box will open allowing you to select the TVF file to upload from your device.

**Step 5: Uploading Your Video**

Once you have uploaded your TVF, you can upload your video. Scroll down on the page to the Comments area.

- *Click* on the Insert Stuff icon on the text editor.
- On the Insert Stuff menu that opens, *click on Add Kaltura Media*.
- On the Insert Stuff window, *click the plus button*. On the menu that opens, *click Media Upload*.
- The Upload Media window will open. *Click on Choose a file to upload* to select a file on your computer, or *click and drag* the video file into the box.
- Depending on your internet connection speed and the file size, it may take a few minutes to upload the file. *Allow the file to upload completely and do not close the window*.

You may alter the name of the file and add a description.

Once the file is uploaded and any name or description changes have been made, *click*

</> **Save and Embed** to save the video to Kaltura.
• If your video has processed, you may see a preview. Otherwise, you may see an animation that your video is still processing. Even if the video is still processing, you can still submit the video. *Click Insert* to add the video to the assignment or discussion.
• Your video will be added to the text box. *Click Submit* to turn in your assignment.
• You may confirm your submission by clicking on the link to the assignment or discussion and seeing if you can view the video.

**For Support**

Contact the PVM Instructional Design team at pvmit@purdue.edu for assistance.
CLINICAL MENTORSHIP TASKS
INTRODUCTION TO ESSENTIAL TASKS AND CRITERIA

Before starting each task:
1. Read the Goal, Description, Criteria, and Materials to be Submitted for Evaluation and Verification. Understand what is expected for each task.

2. Make sure that all equipment and supplies needed to complete the task are available. Pay particular attention to the details of what needs to be documented and submitted.

3. Make sure to obtain appropriate permissions where necessary. Please inform the facility’s owner/manager of activities. A good relationship with the veterinarian in charge is key to having a positive Clinical Mentorship experience.

After performing each task:
4. Label all items submitted so that the materials submitted for evaluation and validation at Purdue are identified as the student’s submission.

5. Label all videos posted to Brightspace with the task number.

6. Submit materials by the deadlines listed in the logbooks.

CLINICAL MENTORSHIP PROJECTS
INTRODUCTION TO SPECIAL PROJECTS

Certain mentorships will have required projects to complete in addition to the required tasks. These are skills that are better assessed in the form of a project. Projects should be typed, and checked for correct grammar and spelling.

Before starting each project

1. Read through the project in its entirety. This will give you a description of the project and what is needed to complete it successfully.

2. Determine what materials, if any, need to be submitted for completion of the project.

3. Most projects will come with a list of questions that need to be answered. The responses should be included in the write up.

4. If videotaping is required for a project, it should be noted on the videotape verbally that this is for the project and not another required task. Some projects may require a verbal narration of a student doing something. Each individual project will define if that is a necessary requirement for that project.

Note: Videotaping and photographs are not for the purpose of verifying if the practice is within OSHA compliance or other government regulations. These projects are for the student’s education. It may be determined by the student that the practice is not within the current recommendations. The purpose of these projects is to make the student aware of these issues, and how to recognize the issues and develop suggestions for improvement.

There will be certain mentorships where OSHA recommendations, in regards to equipment and policies, will be facility requirements for the mentorship.
1. NARRATED TOUR OF THE VETERINARY FACILITY

**Goal:** The student will provide a narrated video tour of the veterinary facility in which VM 22300 mentorship tasks will be completed.

The narrated tour of the facility must include the following:
- The student **must** introduce the tour, showing their face clearly on the video
- Starting outside, showing the sign on the building and entering the client waiting area
- Exam room
- Treatment area including sharps containers and examples of several secondary containers*
- Pharmacy area
- Lab area including diagnostic equipment
- Radiology area including safety equipment (lead aprons, gloves, and thyroid shields)
- Surgical suite including anesthesia machines and monitoring equipment
- Dental equipment
- Sterilization equipment for packs and instruments
- Kennel area(s)
- SDS books for employee reference
- OSHA posters displayed for employees**

*Secondary containers **must** be appropriately labeled. These include anything that is put into a different container (spray bottle, squeeze bottle, etc.) from a large container such as a gallon jug. OSHA requires these labels to have either the full Globally Harmonized System (GHS) label or a rating system such as the National Fire Protection Associate (NFPA) diamond.
**NARRATED TOUR OF THE VETERINARY FACILITY**

"The tour **must** show the "OSHA Job Safety and Health: It's the Law" poster and that it is displayed in a conspicuous place where employees can see it. If the facility does not have this, it may be downloaded and printed.

### Materials Submitted for Evaluation and Verification:

1. Narrated video tour of the facility.

   **THE STUDENT MUST ADDRESS ALL CRITERIA LISTED ABOVE AND SHOW ITEMS CLEARLY. IF THE FACILITY DOES NOT HAVE AN ITEM NOT MARKED AS "MUST HAVE", IT MUST BE STATED ON THE VIDEO. ALL "MUST HAVE" ITEMS MUST BE SHOWN.**
2. MEDICATION LABELING

Goal: To accurately fill out a medication label

Description: The student will accurately interpret the veterinarian’s written or verbal orders and transcribe those orders onto a label of the appropriate type for the container being used.

*Note: These may be labels printed for tasks 3-7

Criteria: The student accurately transcribed the veterinarian’s order onto a prescription label. The appropriate label for the medication to be dispensed was used. The handwritten or typed label was legible. The instructions were clearly stated for the client or personnel using the medication.

The label contained the following information: veterinarian’s address, name of client, species, name of the patient, amount to be administered, route of administration, dosage interval for the medication, special instructions for the medication, and the name of the prescribing veterinarian.

Number of Times Task Needs to be Successfully Performed: 3

Materials Submitted for Evaluation and Verification:

1. Task verification form for the filling out medication label skill, signed by the clinical mentorship supervisor.

2. Three written prescriptions or chart orders written by the veterinarian (copies are acceptable).

3. Three properly filled out medication labels that correctly transcribe the written orders from #2 (copies are acceptable).

Patient Name: ___________________________   Date: ___________________________

I verify that the student performed these tasks under my supervision.

Signature of Clinical Mentorship Supervisor: ___________________________
3. Filling an Oral Solid Medication

Goal: To accurately fill a drug order from the veterinarian for an oral solid medication.

Description: The student will accurately interpret the veterinarian’s order and fill an order for an oral solid medication.

Criteria: The student accurately transcribed the veterinarian’s order onto the appropriate label as defined in the Medication Labeling task.

The student chose the correct medication (type, concentration and milligram) to fill the order.

The student used the correct tools, as provided by the practice, to count out the medication.

The student did not handle the medication with their hands.

The student counted out the correct amount as defined in the veterinarian’s order.

The student placed the oral solid medication into the proper container for dispensing.

Number of Times Task Needs to be Successfully Performed: 1

Materials Submitted for Evaluation and Verification:

1. Task Verification form for Filling an Oral Solid Medication, signed by the clinical mentorship supervisor.

2. One video showing the filling of an oral solid medication. The video will clearly show the verbal or written order for the medication by the veterinarian, student selecting the medication, choosing the counting device, counting out the medication, and putting it in the proper container for dispensing. All written materials (medication bottle label, prescription label) should be clearly shown on the video. The student should provide a narrative of the steps being performed during the video.

Signature of Clinical Mentorship Supervisor: ________________________________
4. Filing an Oral Liquid Medication

Goal: To accurately fill a drug order from the veterinarian for an oral liquid medication.

Medication: The student will accurately interpret the veterinarian’s order and fill an order for an oral liquid medication. The medication should not be a prepackaged liquid medication that needs to be diluted. It should be a medication that is stored in bulk and small amounts are dispensed.

Criteria: The student accurately transcribed the veterinarian’s order onto the appropriate label as defined in the Medication Labeling task.

The student chose the correct medication (type and concentration) to fill the order.

The student used the correct tools, as provided by the practice, to measure out the proper amount of medication.

The student chose the correct container to hold the volume of medication needed for dispensing.

The student measured the correct amount for dispensing as defined in the veterinarian’s order.

The student identified the device needed to administer the liquid medication.

Number of Times Task Needs to be Successfully Performed: 1

Materials Submitted for Evaluation and Verification:

1. Task Verification form for Filling a Liquid Medication, signed by the clinical mentorship supervisor.

2. One video showing the filling of a liquid medication. The video will clearly show the verbal or written order for the medication by the veterinarian, the student selecting the medication, choosing the measuring device, putting it in the measuring device, measuring the medication, putting it in the proper container for dispensing and choosing the correct device to administer the medication. All written materials (medication bottle label, prescription label) should be clearly shown on the video. The student should provide a narrative of the steps being performed during the video.

5. Reconstitute a Medication for Dispensing

Goal: To accurately reconstitute a medication for dispensing

Description: The student will accurately interpret the veterinarian’s order and reconstitute a medication for dispensing.

Criteria: The student accurately transcribed the veterinarian’s order onto the appropriate label as defined in the Medication Labeling task.

The student chose the correct medication (type and concentration) as ordered by the veterinarian.

The student chose the correct device to measure the diluent to be added to the medication.

The student chose the correct diluent, as defined by the manufacturer’s instructions.

The student followed the manufacturer’s instructions in adding the diluent and preparation for dispensing.

The student identified the device needed to administer the liquid medication.

The student identified, on the label, instructions for shaking and refrigeration if indicated by the veterinarian or manufacturer.

Number of Times Task Needs to be Successfully Performed: 1

Materials Submitted for Evaluation and Verification:

1. Task Verification form for Reconstituting of a Liquid Medication, signed by the clinical mentorship supervisor.

2. One video showing the Reconstituting of a liquid medication. The video will clearly show the verbal or written order for the medication by the veterinarian, the student selecting the medication, choosing the diluent and measuring device, measuring the diluent, adding it to the powdered preparation, choosing the correct device to administer the medication and adding additional instructions such as shaking and refrigeration to the medication label. All written materials (medication bottle label, prescription label) should be clearly shown on the video. The student should provide a narrative of the steps being performed during the video.

Signature of Clinical Mentorship Supervisor: ________________________________
6. Reconstitute a Vaccine

Goal: To accurately reconstitute a vaccine

Description: The student will reconstitute a vaccine based on the manufacturer’s guidelines

Criteria:
- The student chose the proper vaccine as specified by the veterinarian.
- The student chose the correct diluent as specified by the vaccine manufacturer.
- The student chose the correct device to withdraw the diluent from the vial.
- The student wiped off the top of the vials with an alcohol sponge.
- The student followed the manufacturer’s instructions in adding the diluent to the powdered vaccine preparation.
- The student gave the reconstituted vaccine to the veterinarian to be administered.

Number of Times Task Needs to be Successfully Performed: 1

Materials Submitted for Evaluation and Verification:
1. Task Verification form for Reconstituting a Vaccine, signed by the Clinical Mentorship Supervisor.
2. One video showing Reconstitution of a vaccine. The video will clearly show the **verbal or written order for the vaccine by the veterinarian**, the student selecting the vaccine, choosing the diluent and measuring device, measuring the diluent, adding it to the powdered vaccine preparation and recording the lot number. Written labels should be clearly shown on the video. The student should provide a narrative of the steps being performed during the video.

Signature of Clinical Mentorship Supervisor: ________________________________
7. Dispense Medication to the Client

**Goal:**
To dispense medication to the client.

**Description:**
The student will dispense medication to the client, explaining medication administration, administration devices and special instructions if indicated.

**Criteria:**
The student accurately verbalized the veterinarian’s order to the client.
The student asked the client if they have ever given this type of medication to their pet before.
The student *demonstrated on the pet* how to administer the medication.
The student identified any possible adverse reactions the client should be aware of and what the client should do if they occur.
The student asked the client if they had any questions.

**Number of Times Task Needs to be Successfully Performed:** 2

**Materials Submitted for Evaluation and Verification:**
1. Task Verification form for Dispensing Medication to a Client, signed by the Clinical Mentorship Supervisor.
2. Two videoed sessions of dispensing medication to the client. This may be done as a simulation with a staff member, but should be a conversation between the student and the “client”, not a talk to the camera. The videos should clearly show the **verbal or written order for the medication by the veterinarian**, the medication being dispensed, all dialogue between the student and “client” and demonstrations of medication administration. Two sessions must be videotaped: One session should show dispensing an oral liquid medication, and one session should be dispensing a topical agent, such as Advantage®.

**Student Name:** ________________________________

**Supervisor Name:** ________________________________ RVT, CVT, LVT DVM, VMD

**Patient Name:** ________________________________ Date: ___________________________

Medication being dispensed: _____________________________________________________

**Patient Name:** ________________________________ Date: ___________________________

Medication being dispensed: _____________________________________________________

I verify that the student performed these tasks under my supervision.

**Signature of Clinical Mentorship Supervisor:** ________________________________
8. Controlled Substances Project

1. The student will provide a photograph of where the controlled substances are stored in the practice.

2. The student will submit a blank page from the controlled substances log that is used by the practice.

3. The student will submit a paper answering the following questions in regards to controlled substances:
   a. Who has access to the controlled substances?
   b. How often are the controlled substances informally inventoried? How often is formal inventory done?
   c. Assess whether the current practices employed by this practice are in compliance with current regulations (What are the regulations?)
   d. Could the current method of storage and record keeping of controlled substances be improved? If so, please explain why and how you would change it. If not, explain why you believe it to be adequate.

The paper should be typed and in paragraph format.

9. Inventory Procedures Project

1. The student will submit a paper describing the pharmacy inventory procedure utilized at the practice. Only medications/pharmaceuticals should be addressed. The description should include the following:
   a. Who keeps track of current pharmacy inventory? How often is a formal inventory conducted?
   b. What is the process of ordering? For example, once it is identified that something needs to be ordered, how is the ordering process carried out? What is the procedure when orders are received?
   c. Is the current inventory control procedure adequate? Are there ways efficiency can be improved?
   d. Please provide blank copies of inventory forms that are utilized at the practice if they exist. If it is a notebook or other system, describe that in your ordering process.

The paper should be typed and in paragraph format.
10. Storage and Handling of Biologicals and Hazardous Medications Project

1. The student will provide a comprehensive list of any biological and hazardous medications* used in the practice. Only medications/pharmaceuticals should be addressed.

2. The student will provide either a photograph or video of how and where the biological and hazardous medications are stored, and describe any storage considerations.

3. The student will describe the procedure for safe handling of the hazardous medications and biologicals as defined by their practice.

4. The student will describe the procedure for disposal of hazardous medications and biologicals defined by the practice.

5. The student will submit a paper providing a critique of the above procedures to answer the following:
   a. Do the procedures follow safety guidelines as defined by OSHA regulations? (What are the regulations?)
   b. Are there ways the current procedures can be improved?

The paper should be typed and in paragraph format.

*Biologicals include vaccines and hormone medications such as oxytocin, estrogens, insulins. Hazardous medications include chemotherapeutics, chloramphenicol, inhalant anesthetics, and any other substance that should be handled/disposed with PPE or other precautions. The following are resources the student should utilize when making a list of these medications in their facility:

www.aphis.usda.gov/aphis/ourfocus/animalhealth/veterinary-biologics/CT_Vb_licensed_products

Current Veterinary Biologics Product Catalog
