Data Science Needs Veterinarians! (They Just Don't Know it Yet)

April 12, 2022
8:30am, Lynn Hall 1136

Dr. Sumiko Mekaru, DVM, PhD
Director of Public Health and Clinical Design at The Public Health Company (PHC)

Dr. Mekaru is an epidemiologist operating at the intersection of traditional epidemiology and technology and leading cross-disciplinary teams to solve challenges in public health. She previously led the development of forecasting models for disease transmission, resource utilization, and critical events for the Department of Defense COVID-19 response. She has also led health technology teams at Epidemico and Boston Children’s Hospital, creating innovative health surveillance tools. She has published extensively on infectious disease outbreak monitoring, modeling, and surveillance. She holds a Doctor of Veterinary Medicine from Tufts University and a PhD in epidemiology from Boston University.
