

VET ADVENTURES

Being a vet is exciting! It's the best job ever! Veterinarians help keep people and animals from getting sick. Veterinarians are also teachers and scientists, discovering new ways to keep people and animals healthy. Veterinarians are doctors for all kinds of animals — pets, farm animals, working animals, and wildlife.

In this game you get to create amazing vet adventures and share them with others. You can even use your official
League of VetaHumanz journal!

Vet Adventure Moves

Build: Make the story longer by placing your card at the beginning or end.

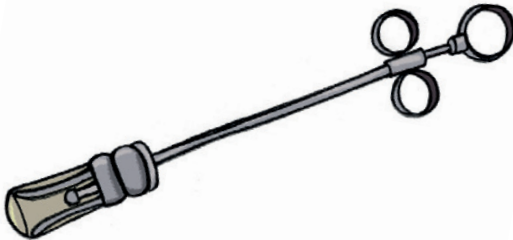

Branch: Add a side story by placing your card next to another card.

Blanket: Change the story by covering up a card with your card.

Break: Insert a card in between 2 cards that have already been played.

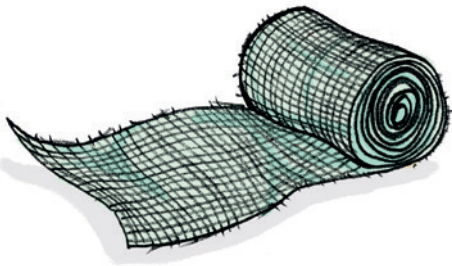

TOOLS & ACTIONS

Balling Gun (Bawl-ing Gun): Balling Guns are used to help cows swallow big pills like medicine or vitamins.

TOOLS & ACTIONS

Bandages (Ban-did-jiz): Bandages are used to cover and protect places that have gotten hurt like cuts or scrapes.

TOOLS & ACTIONS

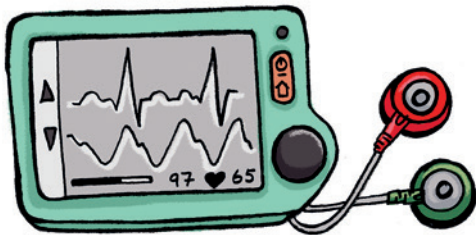

Bandage Scissors (Ban-didj Sizzrs): Bandage Scissors are special scissors used to cut bandages.

TOOLS & ACTIONS

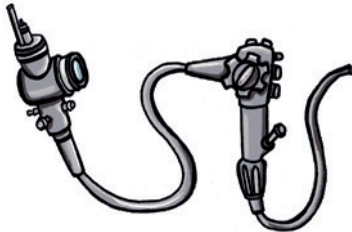

Computer (Kum-pew-ter): Computers are used to keep and see medical records and other information.

TOOLS & ACTIONS

ECG (EEE-CEE-GEE): An electrocardiogram, or ECG for short, is used to detect problems with the heart.

TOOLS & ACTIONS

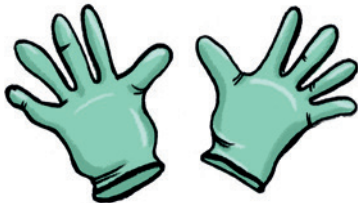

Endoscope (N-doe-skope): Endoscopes are tools with cameras used to see inside the body.

TOOLS & ACTIONS

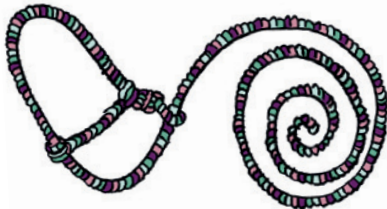

Endotracheal Tube (N-doe-tray-key-ill Toob): Endotracheal Tubes are used to help animals breathe. They are placed in an animal's windpipe during an operation or in emergencies when an animal is having trouble breathing.

TOOLS & ACTIONS

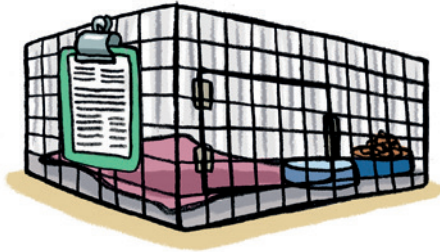

Gloves (Gluhvz): Gloves can protect hands from harmful things like germs. Remember to wash your hands after taking your gloves off.

TOOLS & ACTIONS

Halter (Hall-terr): Halters are used to help lead or hold an animal. The halter goes over the animal's head. A rope attaches to the halter.

TOOLS & ACTIONS

Isolation (Eye-sew-lay-shun): Isolation is keeping a patient alone so they cannot spread germs or diseases.

TOOLS & ACTIONS

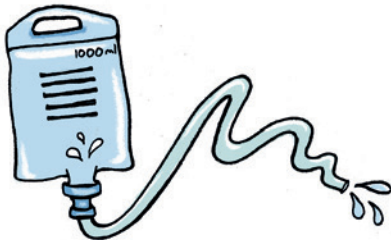

Hoof Trimmers (Who-ff Trim-ers): Hoof Trimmers are used like nail clippers to keep hooves at a comfortable length.

TOOLS & ACTIONS

Horse Dental Float (Hors Den-tel Flowt): Horse Dental Floats are used to file off sharp points or edges on horses' teeth.

TOOLS & ACTIONS

Fluids (Flew-ids): Fluids are given to animals that are dehydrated or cannot drink on their own.

TOOLS & ACTIONS

Surgical Mask (Sir-jih-kull Mask): Surgeons wear masks to prevent mouth and nose germs from spreading during surgery.

TOOLS & ACTIONS

Medicine (Med-ih-sin): Medicine is used to treat animals that are sick.

TOOLS & ACTIONS

Microscope (My-crow-skope): Microscopes are like magnifying glasses. Microscopes make tiny things bigger so you can see them with your eyes.

TOOLS & ACTIONS

Needle Holders (Knee-dull Hole-ders): Surgeons use Needle Holders to guide the needle when they are sewing things back together.

TOOLS & ACTIONS

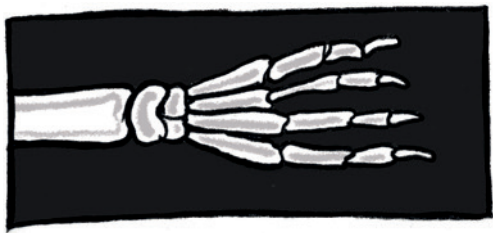

Otoscope (Oh-toe-scope): Otoscopes are used to look inside ears.

TOOLS & ACTIONS

Ophthalmoscope (Opp-thall-mo-scope): Ophthalmoscopes are used to look inside eyes.

TOOLS & ACTIONS

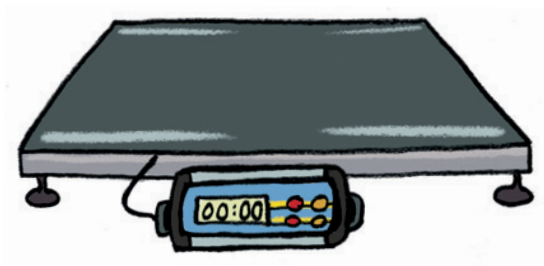

Radiograph (Ray-dee-oh-graff): Radiographs are pictures of the inside of the body made with x-rays.

TOOLS & ACTIONS

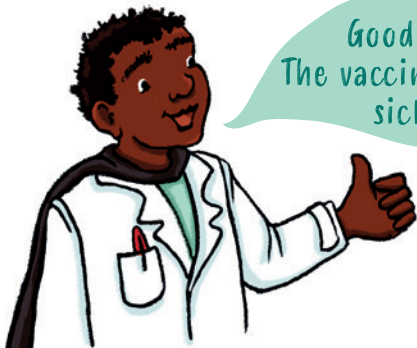

Scrub Brush (Skrub Bruh-sh): Surgeons use Scrub Brushes to get their hands and fingernails super clean before operating.

TOOLS & ACTIONS

Scale (Skail): Scales are used to weigh animals.

BOOST

Good choice!
The vaccine prevented
sickness.

BOOST

Good
diagnosis!

The medicine
cured the
disease!

BOOST

Excellent work!
The surgery fixed
the problem!

BOOST

Great job!
Your patient feels
amazing!

BOOST

You
did it!

The medicine
cured the
disease!

BOOST

Your hard work
paid off and saved
the animal!

BOOST

BOOST

You stuck with
it and found
a cure!

BOOST

You used your
powers for
good!

BOOST

Always learning
paid off!
You solved the
problem!

Vet Adventures was developed by a veterinarian, Dr. Sandy San Miguel, and a teacher, Michelle Overman, as a fun way to learn about the wonderful things veterinarians do to help people and their animals. We hope that you enjoy playing!

Illustrations by: Vicky Fieldhouse

Design by: Allison Gardner

Get more superpowers at:
www.VetaHumanz.org

How to Play

1. Play alone or with friends.
2. Put all the cards in the middle and mix them up.
3. Pick 12 cards without peeking.
4. Pretend that you are a superhero veterinarian talking about your adventures.
5. Play one card at a time (take turns with friends).
6. Build, branch, blanket, or break and tell the story about the card.
7. Play until everybody's cards are gone.
8. Remember to be creative and have fun!

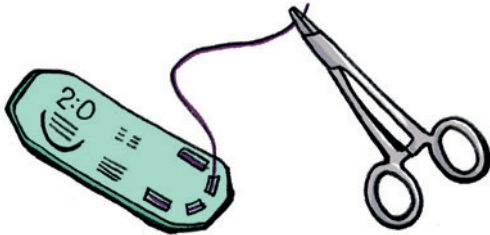

TOOLS & ACTIONS

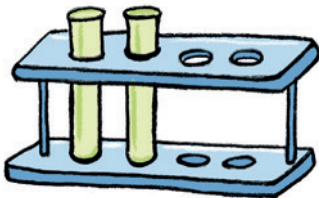

Stethoscope (Steh-thoh-skope): Stethoscopes are used to listen to heart beats, breathing or gut sounds.

TOOLS & ACTIONS

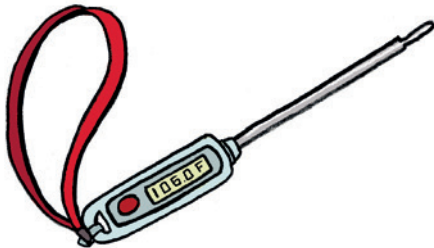

Suture (Suu-churr): Suture is a special thread that doctors use to make stitches when sewing things back together.

TOOLS & ACTIONS

Test Tubes (Tehst Toobz): Test Tubes are used to hold samples of things collected from inside of animals like blood or urine, until the samples can be examined in a laboratory.

TOOLS & ACTIONS

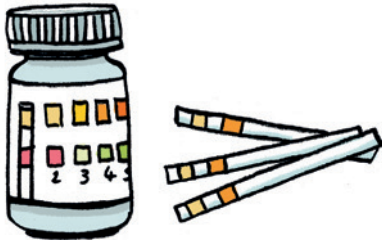

Thermometer (Thur-mom-meh-turr): Thermometers are used to take an animal's temperature.

TOOLS & ACTIONS

Ultrasound (Uhll-truh-sownd): Ultrasound machines are used to look inside an animal's body.

TOOLS & ACTIONS

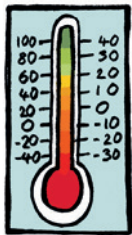

Water Test Kit (Wah-terr Tehst Kit): Water Test Kits are used to see if the water that fish live in is clean and safe.

TOOLS & ACTIONS

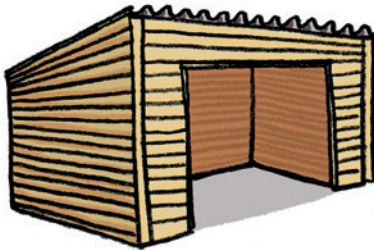

Surgery (Sir-jur-ee): An operation during which human and animal doctors called surgeons use tools to treat injuries or diseases.

TOOLS & ACTIONS

Temperature (Tem-per-ah-tur): Temperature is the degree of hotness or coldness of something.

TOOLS & ACTIONS

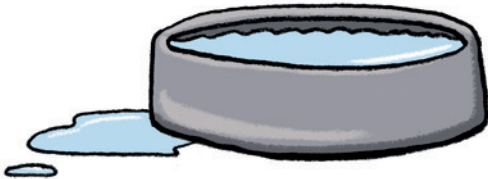

Shelter (Shell-turr): Shelter is a place that covers and protects animals and people.

TOOLS & ACTIONS

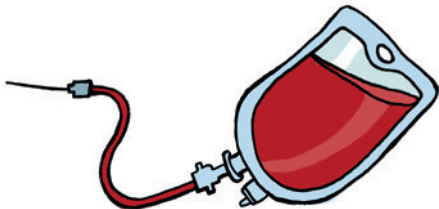

Nutrition (New-trih-shun): Nutrition is the process by which an animal uses food to stay healthy.

TOOLS & ACTIONS

Water (Wah-terr): Water is a liquid that is a major part of living things.

TOOLS & ACTIONS

Blood Transfusion (Blud Tranz-few-shun): Blood Transfusion is the process of taking blood from a healthy donor animal and putting it inside another animal that needs blood.

TOOLS & ACTIONS

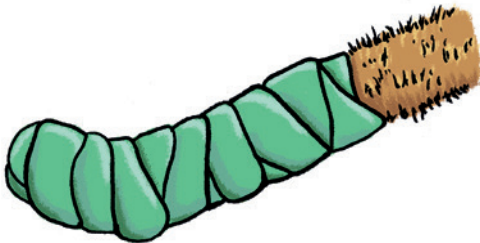

Physical Exam (Fizz-ick-el X-am): Physical Exam is a health check where body parts are examined to see if there are any problems.

TOOLS & ACTIONS

Feces (Fee-sees) and Urine (Your-in): Feces and Urine are solid and liquid wastes eliminated from the body.

TOOLS & ACTIONS

Cast (Kast): A Cast is a form placed around an area to protect the area while it heals.

TOOLS & ACTIONS

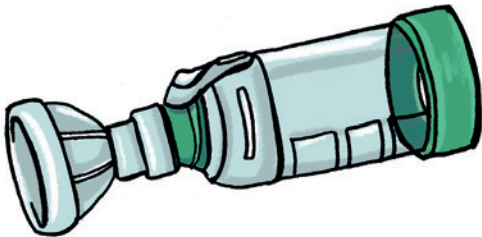

Splint (Spul-int): A Splint is stiff material used to protect a body part and keep it in place.

TOOLS & ACTIONS

Rest (Resst): Rest is a state of no activity.

TOOLS & ACTIONS

Asthma Inhaler (Az-ma In-hale-ur): An Asthma Inhaler is a device used to inhale medicines through the mouth or nose.

TOOLS & ACTIONS

Vaccine (Vax-een): Vaccines are given to increase protection against getting a disease.

TOOLS & ACTIONS

Dental Exam (Den-tel X-am): A dental visit is with a special doctor called a dentist who examines the teeth and mouth.

TOOLS & ACTIONS

E-Collar (Eee Call-ur): E-Collar is a stiff cone placed around an animal's neck so it can't bite, lick or scratch body parts that are healing.

TOOLS & ACTIONS

Diagnostic Testing (Die-ag-noss-tick Tesst-ing): Diagnostic Testing is testing to identify the cause of an illness.

BOOST

Fantastic find!
Your article
will be in every
journal!

BOOST

Congratulations!

You saved
the day!
